Skills

HTML5, CSS3, SCSS, JavaScript (ES6), React, NextJS, Node, Express, SQL, PostgreSQL, MongoDB, Mongoose, git, GitHub, VS Code

Personal Projects

deltaChannel – an anonymous textboard built with MERN stack as a single-page application, deployed to Heroku

- Designed UI for readability; different color schemes available to the user
- Built a responsive, mobile-first layout using media queries

My Spellbook – a CRUD app for tabletop RPG players built with MongoDB, Express, and Node that interfaces with an open-source REST API, deployed to Heroku

- Included search feature via an accessible form that allows for filtering requests based on user-defined parameters
- Utilized Passport.js to support user authentication and page authorization

Should You Bring a Jacket? – a weather app built with React, pulls data from open-source API

- Built UI with reusable React components purposed for both departure and arrival forms
- Used React useState Hook to keep track of user's chosen unit of measurement
