Summary

Creative problem solver, team player, and adept written communicator experienced with delivering for clients and teaching diverse audiences. Proficient web developer seeking junior technical role.

Development Experience

Freelance Projects

- Golden Chopsticks Restaurant [ongoing]: updating the web presence of a local restaurant
 - Redesigning website from templating service to new mobile-first HTML/CSS/JS build
 - Optimizing customer ordering UX by reducing scroll-time and adding floating contact info

Portfolio Projects

- [deltaChannel](#): an anonymous textboard built with MERN stack then deployed to Heroku
 - Built a responsive, mobile-first layout with SCSS; different color schemes available to the user
- [My Spellbook](#): a CRUD app for tabletop RPG players built with Mongo, Express, and EJS templates that interfaces with an open-source REST API and deployed to Heroku
 - Included search feature via an accessible form that allows for filtering requests based on user-defined parameters
- [Bring a Jacket](#): a weather app using React that pulls data from an open-source weather API
 - Built UI with reusable React components purposed for both departure and arrival forms
