Skills

Languages	HTML5, CSS3, Sass, JS (ES6)
Libraries/Frameworks	Bootstrap, Bulma, Express
Database	MongoDB
Tools	git, Heroku, Netlify, Node.js

Projects

My Spellbook

[Live Demo](#)

[Source Code](#)

A CRUD web application that helps tabletop RPG players look up and keep track of spells for a game that cannot be mentioned by name due to copyright reasons.

- Employed open-source Open5e API to fetch and display spell data, including a search feature that allows for filtering of results.
- Implemented user authorization and validation with Passport. Non-registered users can search for spells while registered users are also able to add, edit, and create new spells in their own persistent collection.
- Designed frontend with Sass, including CSS flexbox.

Should I Bring a Jacket?

[Live Demo](#)

[Source Code](#)

A weather application that allows users to check out the current day's weather forecast for their departure city and arrival city. The app looks at the destination and suggests whether user should bring a jacket or not.

- Created with Open Weather Map API to fetch data: forecast, temperature, humidity, and wind speed. Suggestion message will display after both cities are chosen by the user.
- Built search bar featuring auto-completion using vanilla JS for cities of the world.
- Included feature allowing users to toggle temperature results to display in either Celsius or Fahrenheit.

selfLESS

[Live Demo](#)

[Source Code](#)

A static mock landing page for a fictitious gig economy company. Features a clean, simple UI and built completely in vanilla HTML, CSS, and JS.

- Features income calculator that dynamically updates DOM after user chooses a city, the type of provided labor, and length of the rental.
- Reuses search bar featuring auto-completion for calculator with major cities of America.
- Implemented a button to toggle dark theme for night-time reading, designed with CSS custom properties. Both light and dark color schemes were designed with accessibility in mind.

Education

B.S. Management Science

University of California, San Diego, 2012

Other Work Experience

Story Terrace

Remote

Senior Writer

July 2016 to present

- Write 7,500 to 12,500-word books for clients retelling key points in their lives.
- Conduct 4 to 6 hours of informational interviews with clients.
- Complete and submit drafts to editor working within Story Terrace standards and client-set deadline.

English Program in Korea

Taebaek, Gangwon, South Korea

Guest English Teacher (GET)

August 2013 to August 2015

- Taught English as a Second Language to elementary, middle, and high school students. Created lesson plans for 24 classes/week for 15 to 25 students/class.
- Collaborated with Native Korean Teachers for each grade level for lesson critique, teaching strategy, and classroom management implementation.
- Contributed to teaching, design, and facilitation of summer and winter English camps with teams of fellow GETs, and independently.
